LETTER OF PROMULGATION.

TREASURY DEPARTMENT,
BUREAU OF THE UNITED STATES
PUBLIC HEALTH SERVICE,
Washington, D. C., 1921.

To commissioned medical officers, acting assistant surgeons, and others concerned:

The following list of diseases and conditions shall be used for the official recording of disabilities after December 31, 1921.

No title other than those contained in the following list is to be employed in official returns to the bureau.

C. C. PIERCE,
Acting Surgeon General.

NOMENCLATURE OF DISEASES AND CONDITIONS.

This nomenclature is subject to change from time to time, as new terms arise and others become obsolete, or are changed with the rapid progress taking place in medicine and surgery and their specialties. It consists of three primary divisions, which are numbered serially:

1. Diagnostic terms.
2. Poisons and intoxications.
3. Traumatisms.

There are two supplemental lists, namely, Anatomic terms and operations.

The following points are to be observed in assigning a diagnosis: (a) Titles in italics are not to be used except when the primary disease is not determined. (b) When two or more morbid entities exist, preference should be given to (I) an infectious disease; (II) the graver affection; and (III) a primary disability over a complication, but care should be taken to state the second condition after the first.

Certain titles, as "Abscess, otherwise unclassified," "Fracture, simple, otherwise unclassified," "Gonococcus infection, otherwise unclassified," are intended to cover conditions for which no other title is provided. In such cases the location will be stated in accordance with the list of anatomic terms. All gonococcal, syphilitic, and chancroidal infections must be recorded under gonococcal, syphilitic, chancroidal titles, and titles such as urethritis acute, cystitis acute, gonocystitis acute, etc., must not be used as primary diagnosis when due to venereal infection.

Infections due to parasites should be reported under the name of the disease, with addition of the site and technical name of the parasite. In case of doubt in regard to the genus and species, the specimen may be sent to the Hygienic Laboratory for determination.

It will be noted that the term "under observation" has been inserted and in all cases where a tentative diagnosis has been made, the final diagnosis should be submitted at the earliest possible moment on a supplemental report.

It is desirable to have injuries classified according to both their nature and their causes. Provision has, therefore, been made for showing the cause of the injury as well as its nature.

The classification of causes should be made as follows:

- A. Suicidal.
- B. Homicidal.
- C. Conflagration. Includes all injuries incident to general conflagration.
Burns otherwise received are not classed hereunder.
- D. Accidental drowning or submersion.
- E. Traumatism by firearms, accidental. To include all injuries caused by the projectile, the blast from great guns, or from the piece when fired.
- F. Traumatism by explosion. To include powder, gas, compressed air, or steam explosions, also the explosion of a gun.
- G. Traumatism by fall.
- H. Traumatism by motor vehicles.
- I. Traumatism by airplanes.
- J. Traumatism by railroads.
- K. Traumatism by other vehicles.
- L. Traumatism by machines.
- M. Traumatism by other crushing.
- N. Traumatism due to athletic sports.
- O. Effects of electricity.
- P. Industrial injuries.
- Q. Injuries by animals.
- R. Injuries at birth.
- S. Casualty in action.
- T. Traumatism due to violence other than noted above.
- U. Chemical. State chemical.
- V. Traumatism by brawls.
- W. Disease, as causative agent. State disease.

The above key letters are to be used, for example, as follows: Gunshot wound of brain (A), showing that it was inflicted with suicidal intent; (B), that it was homicidal; while if received in action the entry appears as (S). Accidental drowning or submersion should appear with the suffix (D), while if due to the destruction of a ship by fire as (C); if incident to the explosion of a magazine as (F), unless the same is incident to action, when it should appear as (S).

The numbers assigned to each anatomic location are used to reduce the number of terms in the nomenclature, and to aid in coding in the Statistical Department. In each entry of diagnostic terms, the anatomic part is to be clearly defined, but the number assigned need not appear on the report. For example, in reporting "Tuberculosis of the knee" the term "**Tuberculosis**, otherwise unclassified, **No. 1712**," will be used. The same number will be utilized for reporting tuberculosis of the kidney or any other anatomic part, thus: Tuberculosis of the knee, 1712; tuberculosis of the left kidney, 1712; tuberculosis of the larynx, 1712, etc.

The list of operations is to be used in conjunction with diagnostic and anatomic terms, i. e., the diagnosis will supplement the name of the operation. When more than one diagnosis is given the diagnosis to which the operation refers shall be indicated.

The numbers printed on the right hand side of diagnostic terms refer to the following classification:

1. **Abnormalities and congenital malformations.**
2. **Blood and Blood forming organs,** Diseases and injuries of.
3. **Bones and Cartilages,** Diseases and injuries of.
4. **Circulatory system,** Diseases and injuries of.
5. **Communicable and infectious diseases,** not including tuberculosis and venereal.
6. **Dental.**
7. **Digestive system,** Diseases and injuries of.
8. **Ear, Nose, and Throat,** Diseases and injuries of.
9. **Endocrines,** Diseases and injuries of.
10. **Eye and Annexa,** Diseases and injuries of.
11. **Genito-urinary system,** Diseases and injuries of (exclusive of venereal).
12. **Hernia.**
13. **Joints and Bursae,** Diseases and injuries of.
14. **Lymphatic system,** Diseases and injuries of.
15. **Muscles, fasciae, tendons, and tendon sheaths,** Diseases and injuries of.
16. **Nervous system,** Diseases and injuries of.
17. **Obstetric and gynecological conditions.**
18. **Parasitic diseases.**
19. **Poisonings and intoxications.**
20. **Psychiatric diseases.**
21. **Respiratory system,** Diseases and injuries of (exclusive of Tuberculosis).
22. **Skin and its appendages,** Diseases and injuries of.
23. **Tuberculosis.**
24. **Tumors.**
25. **Venereal diseases.**
26. **Miscellaneous.**

The numbers of above classification have been inserted chiefly for purposes of statistical tabulation and should not appear on official reports to the Surgeon General, unless otherwise instructed.

Many of the terms classified as 26 (miscellaneous) may fall under any of the other classes when the location and cause are given, for instance, **Atrophy (0169)** is classified as 26; however, **Atrophy of Tonsil** would come under class 8.
